D-Link - Ændring af funktion (bridge-/routermode)

- 2018-06-01 - D-Link

For at kunne ændre denne funktion forudsætter det, at du er logget ind i routeren.

[Vejledning kan findes her](#)

Ændring af funktion (bridge/router mode)

1. Log ind i routeren - se ovenstående
2. Vælg "Settings"
3. Klik på "Internet"
4. I feltet "Device mode" ændres routerens funktion fra "Router mode" til "Bridge mode" eller omvendt.
5. Klik på "Save"

The screenshot shows the D-Link router's web interface. At the top, there's a navigation bar with 'Home', 'Settings', 'Features', and 'Management'. The main content area is titled 'Internet' and includes a globe icon and instructions: 'Use this section to configure your Internet connection. If you are unsure of your connection method, please contact your Internet service provider. If you are using PPPoE, you will need to remove or disable any PPPoE client software on your computer.' A dropdown menu is open over the 'Device Mode' field, showing options: Wizard, Internet (highlighted), Wireless, Network, SharePort, and mydlink. Below the dropdown, the 'Device Mode' is set to 'Router Mode'. The 'My Internet Connection is:' field is set to 'Dynamic IP (DHCP)'. There are 'IPv6' and 'Save' buttons visible. At the bottom right, there is a link for 'Advanced Settings...'.
