## Jensen - Ændring af funktion (bridge-/routermode)

#Marketing - 2018-06-01 - Jensen

For at kunne ændre denne funktion forudsætter det, at du er logget ind i routeren.

[Vejledning kan findes her](#)

Ændring af funktion (bridge/router mode)

1. Log ind i routeren - se ovenstående
2. Vælg "Advanced"
3. Klik på "NAT"
4. Ud fra "NAT Module" ændres routerens funktion fra "Router mode" til "Bridge mode" ved at disable eller enable NAT.  
Er NAT enabled er routeren i "router mode".  
Er NAT disabled er routeren i "bridge mode"
5. Klik på "Apply"

The screenshot shows the Jensen router's web interface. At the top, there is a status bar with the following information:

|                  |                 |                    |
|------------------|-----------------|--------------------|
| INTERNET STATUS  | WIFI NAME(SSID) | WIFI NAME 5G(SSID) |
| Connected        | JensenLynx5000  | JensenLynx5000_5G  |
| FIRMWARE VERSION | WIFI PASSWORD   | WIFI PASSWORD 5G   |
| v1.05            | dktvsupport     | dktvsupport        |

System time: 11.10.2016-13:55 Modelno: Lynx5000

The main interface is divided into two tabs: "BASIC" and "ADVANCED". The "ADVANCED" tab is selected. On the left side, there is a navigation menu with the following items: Home, Advanced Settings, System, WAN, LAN, 2.4GHz Wireless, 5GHz Wireless, QoS, NAT (highlighted with a green box), Port Forwarding, Virtual Server, Special Applications, UPnP Settings, ALG Settings, and Firewall.

The "NAT" settings page is displayed. It contains the following text: "NAT (Network Address Translation) allows multiple users at your local site to access the Internet through a single Public IP Address or multiple Public IP Addresses. NAT provides Firewall protection from hacker attacks and has the flexibility to allow you to map Private IP Addresses to Public IP Addresses for key services such as the Web or FTP."

Below the text, there is a radio button selection for "NAT Module":  Enable  Disable. An "APPLY" button is located to the right of the selection.
