## D-Link - Ændring af funktion (bridge-/routermode)

- 2018-06-01 - D-Link

For at kunne ændre denne funktion forudsætter det, at du er logget ind i routeren.

[Vejledning kan findes her](#)

Ændring af funktion (bridge/router mode)

1. Log ind i routeren - se ovenstående
2. Vælg "Settings"
3. Klik på "Internet"
4. I feltet "Device mode" ændres routerens funktion fra "Router mode" til "Bridge mode" eller omvendt.
5. Klik på "Save"

The screenshot shows the D-Link router's web interface. At the top, there is a navigation bar with 'Home', 'Settings', 'Features', and 'Management'. The 'Settings' tab is active. Below the navigation bar, the 'Internet' settings page is displayed. The page title is 'Internet' and it includes a globe icon. The main content area has a dropdown menu open over the 'Internet' link, showing options: Wizard, Internet (selected), Wireless, Network, SharePort, and mydlink. Below the dropdown, there are two dropdown menus: 'Device Mode:' set to 'Router Mode' and 'My Internet Connection is:' set to 'Dynamic IP (DHCP)'. To the right of these dropdowns are 'IPv6' and 'Save' buttons. At the bottom right, there is a link for 'Advanced Settings...'. The breadcrumb 'Settings >> Internet' is visible at the bottom left of the main content area.
